ABOUT

AFull-stack developer with hands-on experience in frontend and backend development, and exposure to DevOps workflows.
Comfortable working in team environments with modern technologies like React, Next.js, Node.js, and Docker.
Eager to contribute to real-world products and grow in a fast-paced, collaborative engineering team

SKILLS

Frontend
- HTML/CSS
- JavaScript
- TypeScript
- ReactJS
- NextJS
- Tailwind

Backend
- NodeJS
- Express
- MongoDB
- SQL
- Cloudinary

DevOps & Infrastructure
- Docker
- Docker Compose
- Traefik
- AWS EC2
- Route 53
- GitHub Actions

Collaboration & Tools
- Git/GitHub
- ClickUp
- Slack
- Figma

EXPERIENCE

Yup.io - Frontend Web Developer   2023 - 2024
- *Redesigned the website and modified the overall structure to meet the company's requirement of elevating the site to the level of an application.*
- *Improved and optimized the website by troubleshooting and defining specific actions, and conducting daily site checks.*
- *Developed and maintained software applications collaboratively within a dynamic development team.*
- *Conducted thorough code reviews, providing constructive feedback to enhance code quality and promote best practices.*
- *Implemented comprehensive unit tests and executed system testing to ensure the high quality and reliability of the software.*
- *Refactored MaterialUI components to Tailwind.*
- *Worked with Figma and UI design tools.*

Bullshit Map - Full-Stack & DevOps Engineer   2025 - present
- *Developed a full-stack geospatial platform linking NFC-scanned physical artwork to a global digital map.*
- *Built a responsive UI using Next.js 15, React 19, Mapbox GL JS, and TailwindCSS.*
- *Engineered backend APIs (Node.js, Express, TypeScript) with secure MongoDB 6 geospatial indexing and media upload via Cloudinary.*
- *Delivered a full admin dashboard for managing artworks, pins, drops, and users with role-based access.*
- *Led deployment with Docker, Traefik, and GitHub Actions on AWS EC2, implementing CI/CD pipelines.*
- *Designed and implemented an AI-driven agent system for task orchestration, validation, and audit logging.*

Tech: React 19, Next.js 15, TypeScript, Node.js, Express, MongoDB 6, TailwindCSS, Mapbox GL JS, Supercluster, Docker, Traefik, AWS EC2, Route 53, GitHub Actions, Cloudinary.

EDUCATION

HackerU - Full-Stack Web   2022 - 2023
Gained proficiency in MEAN and MERN stack technologies in a dynamic learning environment. Acquired skills in frontend, backend, and database development, supplemented by effective use of online resources for problem-solving. Applied knowledge through successful completion of personal projects, presentation assignments, and exercises.
